Overview

Home automation gives you remote or automated control of things around your home. SED provides automation and lighting solutions with user-friendly touch screen interfaces, remote controls, and keypads. These systems are not only affordable but also scalable, allowing you to upgrade as your budget allows.

Entertainment

Creating the mood for your next party or event just got easier. With the touch of a button you can dim the lights, play music, adjust the temperature, and light the fireplace; creating the perfect atmosphere for you and your guests.

Comfort & Safety

SED can provide you with a new level of comfort and safety. Your system can be set to turn on lights and adjust the temperature, always giving you a comfortable and safe environment to come home to.

Energy Savings

SED's automated solutions make it easy to manage your heating, cooling and lighting systems, saving you money on your monthly utility bills.

Convenience & Control

SED makes it possible for you to take control of your home or business when you are away. You can now check, change and control your home's system from anywhere via the Internet.

"I am still in awe at what I can do with my house after working with SED. I am able to control anything from anywhere, and I don't have to ask my kids how to use it."

*-Tom Monson
